Program Report on
Pamphlet Making Workshop

Academic Year-2020-21	
Name of The Program	Pamphlet making Workshop
Date	22/02/2021
Venue	VTCOE Seminar Hall
resource Person	Prof. Waykos. S.S.

Introduction-

Before you learn **how to make a pamphlet**, it is better to understand its uses and importance in marketing and advertising. A pamphlet or a leaflet is a single sheet of paper printed on the front and backside, such as an unbound book. Depending on the design, a brochure folds in half, thirds or fourths. We use pamphlets in many things such as marketing or political campaigning and many other places where you only want to provide information. From here, you can learn to create attractive pamphlets to advertise your business.

Objectives-

Pamphlets can contain anything from information on kitchen appliances to medical information and religious treatises. Pamphlets are very important in marketing because they are cheap to produce and can be distributed easily to customers. Pamphlets have also long been an important tool of political protest and political campaigning for similar reasons.

A pamphleteer is a historical term for someone who produces or distributes pamphlets, especially for a political cause.

Total Students Participants: All Students

Outcome of Event:

The pamphlet has been widely adopted in commerce, particularly as a format for marketing communications. There are numerous purposes for pamphlets, such as product descriptions or instructions, corporate information, events promotions or tourism guides and they are often used in the same way as leaflets or brochures. Due to their ephemeral nature and to the wide array of political and religious perspectives given voice by the format's ease of production, pamphlets are prized by many book collectors. Substantial accumulations have been amassed and transferred to ownership of academic research libraries around the world.

Academic Year-2019-2020

Introduction- Research is "creative and systematic work undertaken to increase the stock of knowledge". It involves the collection, organization and analysis of evidence to increase understanding of a topic, characterized by a particular attentiveness to controlling sources of bias and error.

The primary purposes of basic research (as opposed to applied research) are documentation, discovery, interpretation, and the research and development (R&D) of methods and systems for the advancement of human knowledge. Approaches to research depend on epistemologies, which vary considerably both within and between humanities and sciences.

Objectives-

To generate new knowledge. To gain familiarity or to develop a new insight into some phenomenon. To investigate some existing situation or problem. To construct or create a new procedure or system. To explore and analyze more general issues.

Academic Year-2017-18	
Name of The Program	Develop Research Paper & Seminar Paper
Date	13/12/2017

Introduction-Research is "creative and systematic work undertaken to increase the stock of knowledge". It involves the collection, organization and analysis of evidence to increase understanding of a topic, characterized by a particular attentiveness to controlling sources of bias and error.

The primary purposes of basic research (as opposed to applied research) are documentation, discovery, interpretation, and the research and development (R&D) of methods and systems for the advancement of human knowledge. Approaches to research depend on epistemologies, which vary considerably both within and between humanities and sciences.

Objectives-

To generate new knowledge. To gain familiarity or to develop a new insight into some phenomenon. To investigate some existing situation or problem. To construct or create a new procedure or system. To explore and analyze more general issues.

Introduction-

Blueprinting helps the teachers in designing the instructional strategies as per the guidelines expected in the curriculum.[1] Most of the faculty (100%) involved in the validation of blueprint felt that it acts as a guide in construction of test paper.

Objectives-

The purpose of the test blueprint is to help the candidates taking the exam prepare well for it. It describes the specified format of the test and the weightage of the topics that are to be studied.

What is exam blueprinting? Blueprinting is a method used in creating exams that allows the administrator to check an exam meets the desired requirements. In essence, it enables you to verify that the exam is assessing a particular topic or learning objective at the appropriate level of difficulty.

A blog (a truncation of "weblog") is an informational website published on the World Wide Web consisting of discrete, often informal diary-style text entries (posts). Posts are typically displayed in reverse chronological order so that the most recent post appears first, at the top of the web page.

Academic Year-2020-21	
Name of The Program	E- Pamphlet making
Day & Date	19/03/2020
Venue	VTCOE Seminar Hall
Recourse Person	Prof. Waykos. S.S.
Name of Coordinator	Prof. Shete S.Y

Introduction-

Before you learn **how to make a e- pamphlet**, it is better to understand its uses and importance in marketing and advertising. A pamphlet or a leaflet is a single sheet of paper printed on the front and backside, such as an unbound book. Depending on the design, a brochure folds in half, thirds or fourths. We use pamphlets in many things such as marketing or political campaigning and many other places where you only want to provide information. From here, you can learn to create attractive pamphlets to advertise your business.

Objectives-

Pamphlets can contain anything from information on kitchen appliances to medical information and religious treatises. Pamphlets are very important in marketing because they are cheap to produce and can be distributed easily to customers. Pamphlets have also long been an important tool of political protest and political campaigning for similar reasons.

A pamphleteer is a historical term for someone who produces or distributes pamphlets, especially for a political cause.

Outcome of Event:

The pamphlet has been widely adopted in commerce, particularly as a format for marketing communications. There are numerous purposes for pamphlets, such as product descriptions or instructions, corporate information, events promotions or tourism guides and they are often used in the same way as leaflets or brochures. Due to their ephemeral nature and to the wide array of political and religious perspectives given voice by the format's ease of production, pamphlets are prized by many book collectors. Substantial accumulations have been amassed and transferred to ownership of academic research libraries around the world.

Introduction-

Mobile applications (in short: mobile apps) are software applications designed to run on mobile devices such as smart phones and tablet computers. These technologies have come a long way since the opening of the Apple App Store in 2008, especially in its application for business, information, communication, health, and gaming. Most mobile devices are capable of processing and disseminating information in an efficient way. Smart devices, such as the iPhone or iPad, are equipped with innovative functionalities and unique features for an easy delivery of content, sharing information, and collaborative work over the internet.

Objectives-

New and innovative mobile learning and teaching apps are emerging on a daily basis. This rapid development will push the integrating and usage of mobile apps and smart phones in higher education, even for not technology-savvy teachers and learners.
