1. Vaccine Awareness Guidance:

The strategy is to make video will serve to guide national, state and district level communication activities, so that the information on the COVID-19 vaccines and vaccination process reaches all people, across all states in the country. Objective of activity is to provide prompt, simple and focused communication on the COVID-19 vaccine(s) and vaccination processes and Generate awareness and understanding of the phased approach of prioritizing target group.

Make graphic containing information about COVID 19

Objective of this activity is to create awareness about the Covid-19 and corona virus in the community and also to help people around us and fight against the disease. For this activity students collected all the relevant information from Google, Sorted out all the information and related pictures and posters and lined them up in a sequence. Edited and cropped the pictures as per the requirement, used different Font size, styles and colours to make the info-graph attractive. Finally the info-graph was ready with all the corona relevant information.

- Safe water

Water purifiers in institutional campus are essential for providing clean and safe drinking water to students, staff, and visitors. Water purifiers are integral to providing a safe and healthy environment on institutional campus. They support the well-being of the campus community and contribute to sustainability efforts by reducing the consumption of bottled water.
